BSC IN PARAMEDICAL TECHNOLOGY # YEAR- I DEPARTMENT OF COMMUNITY MEDICINE GMC NAGPUR

DATE DAY TOPIC TEACHER 07-06-2021 MONDAY Sources of water , ways of water contamination, water borne diseases DR KAVINKUMAR 09-06-2021 TUESDAY Water quality standards , role of public health laboratory DR TUSHAR 09-06-2021 THURSDAY Water quality standards , role of public health laboratory DR TUSHAR 09-06-2021 THURSDAY Water quality standards , role of public health laboratory DR KOMAL 10-06-2021 THURSDAY Water purification and disinfection on larger scale DR ROBAL DR ROBAL DR ROBAL DR RUSHALI DR LOG-2021 THURSDAY Health hazards of sewage and sullage & their Disposal DR RUSHALI 16-06-2021 THURSDAY Health hazards of solid wastes, garbage & their Disposal DR RUSHALI 17-06-2021 THURSDAY Hazards of biomedical wastes & their Management DR RUSHALI 18-06-2021 FRIDAY Practical: Conducting sanitary survey of a community or village DR ROMAL 19-06-2021 THURSDAY Practical wrey Insects of medical importance and diseases transmitted by them DR RABHAY CHAVAN 22-06-2021 THURSDAY Vector control measures 25-06-2021 FRIDAY DISEASES caused by rodents and their control DR KAVINKUMAR DR RUSHALI DR RASATI RATHOD DR ABHAY CHAVAN DISEASES caused by rodents and their control DR KAVINKUMAR DR RUSHALI DR KAVINKUMAR DR RUSH				TIME - 12 TO 1 PM
Sources of water , ways of water contamination, water borne diseases Water quality standards , role of public health laboratory Water disinfection at household level. Water purification and disinfection on larger scale Hygiene of the swimming pool Practical: Interpretation of public health laboratory reports Health hazards of sewage and sullage & their disposal Hazards of biomedical wastes, garbage & their Disposal Hazards of biomedical wastes, garbage & their Disposal Hazards of camps , pilgrimages , fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature , humidity Housing and health Diseases due improper environmental sanitation , Sanitation barrier Practical: Water disinfection at household and community level.(well)	DATE	DAY	TOPIC	TEACHER
Water quality standards , role of public health laboratory Water disinfection at household level. Water purification and disinfection on larger scale Hygiene of the swimming pool Practical: Interpretation of public health laboratory reports Health hazards of sewage and sullage & their disposal Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps , pilgrimages , fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature , humidity Housing and health Diseases due improper environmental sanitation , Sanitation barrier Practical: Water disinfection at household and community level (well)	07-06-2021	MONDAY	Sources of water, ways of water contamination, water borne diseases	DR KAVINKUMAR
Water disinfection at household level. Water purification and disinfection on larger scale Hygiene of the swimming pool Practical: Interpretation of public health laboratory reports Health hazards of sewage and sullage & their disposal Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	08-06-2021	TUESDAY	Water quality standards , role of public health laboratory	DR TUSHAR
Water purification and disinfection on larger scale Hygiene of the swimming pool Practical: Interpretation of public health laboratory reports Health hazards of sewage and sullage & their disposal Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level.(well)		WEDNESDAY	Water disinfection at household level.	DR KOMAL
Hygiene of the swimming pool Practical: Interpretation of public health laboratory reports Health hazards of sewage and sullage & their disposal Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	10-06-2021	THURSDAY	Water purification and disinfection on larger scale	DR PRAGATI RATHOD
Practical: Interpretation of public health laboratory reports Health hazards of sewage and sullage & their disposal Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	11-06-2021	FRIDAY	Hygiene of the swimming pool	DR ABHAY CHAVAN
Health hazards of sewage and sullage & their disposal Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level. (well)	14-06-2021	YADNOM	lic health laboratory re	DR MAHESH
Health hazards of solid wastes, garbage & their Disposal Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	15-06-2021	TUESDAY	Health hazards of sewage and sullage & their disposal	DR RUSHALI
Hazards of biomedical wastes & their Management Sanitation of camps, pilgrimages, fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	16-06-2021	WEDNESDAY	Health hazards of solid wastes, garbage & their Disposal	DR KAVINKUMAR
Sanitation of camps , pilgrimages , fairs and during disasters. Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature , humidity Housing and health Diseases due improper environmental sanitation , Sanitation barrier Practical: Water disinfection at household and community level (well)	17-06-2021	THURSDAY	Hazards of biomedical wastes & their Management	DR TUSHAR
Practical: Conducting sanitary survey of a community or village Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	18-06-2021	FRIDAY	, fairs and during d	DR KOMAL
Insects of medical importance and diseases transmitted by them Entomological survey Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	19-06-2021	SATURDAY		DR PRAGATI RATHOD
Vector control measures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	21-06-2021	MONDAY	Insects of medical importance and diseases transmitted by them	DR ABHAY CHAVAN
Vector control méasures Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level.(well)	22-06-2021	TUESDAY	Entomological survey	DR MAHESH
Diseases caused by rodents and their control Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	23-06-2021	WEDNESDAY	Vector control méasures	DR RUSHALI
Measurement of environmental temperature, humidity Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	24-06-2021	THURSDAY		DR KAVINKUMAR
Housing and health Diseases due improper environmental sanitation, Sanitation barrier Practical: Water disinfection at household and community level (well)	-	FRIDAY	200	DR TUSHAR
Diseases due improper environmental sanitation , Sanitation barrier Practical: Water disinfection at household and community level (well)	28-06-2021	MONDAY	Housing and health	DR KOMAL
Practical: Water disinfection at household and community level (well)	29-06-2021	TUESDAY	Diseases due improper environmental sanitation , Sanitation barrier	DR MAHESH
	30-06-2021	WEDNESDAY	Practical: Water disinfection at household and community level. (well)	DR RUSHALI
